

The CPIFP Los Enlaces in Zaragoza (Spain) is a vocational training centre that offers several professional degrees in Computing, Image & Media and Transport Management. We would request your cooperation in the transfer of information to vocational training centers and companies that want to welcome our students.

We have the Quality Certification from AENOR and we received the Erasmus Charter three years ago (Erasmus institutional code: E ZARAGOZ16).

Thanks to this European Program, we plan to send students to different countries to do work experience training in companies next year for 3 months (April-June)

During the work experience period, the students will work without any cost for the company and they will be supervised by a teacher of our centre.

Our aim is for the students to gain experience and at the same time improve their professional skills, while benefiting the company with their help.

We would be very pleased to establish a new partnership with your company for future collaboration. If you were interested in our candidates we will complete the information given with any specific requirement you have.
