

IRTA (Tecnologia dels Aliments) is a centre for research, development and Technical assistance for food companies (www.irta.es) in Spain.

We are looking for a person (student or graduated) interested in a placement under the Erasmus or Leonardo da Vinci programmes at our company.

The person would be involved in the development of meat products and ready meals and/or development of new processes or optimization of existing processes. The tasks to be accomplished would be: manufacture of different meat products and ready meals , sensory evaluation, physico- chemical analyses, etc.
